

WHO WE ARE

DataLoom is a leader in healthcare software. It provides Internet based solutions to patients and physicians. We are excited to introduce another Healthcare breakthrough product.

“My Professional Partner” is truly a unique healthcare solution that brings the physician and patient together via the Internet. This product is a designed website that enables the patient and physician fast, seamless access to relevant medical information that provides the patient the necessary medical assistance required.

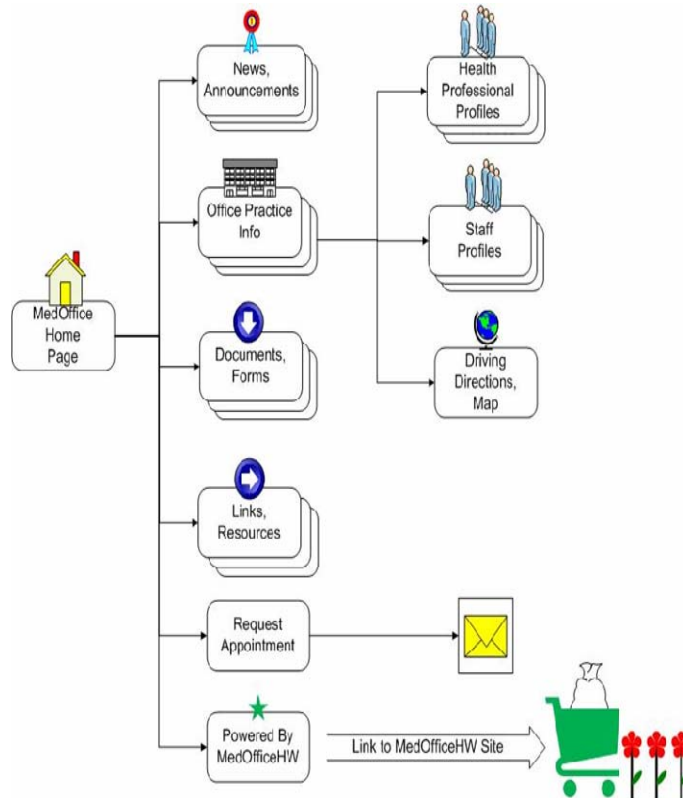

Patient Access: Existing and new patients, whether at home or away from home, can have immediate contact with their physician for medical assistance. DataLoom offers patients and their physicians the convenience to communicate with each other via the web.

Easy Access: We understand that patients want easy access to their physician from any computer location in the world. We built easy accessibility and functionality into My Professional Partner. The software provides robust features allowing patients quick access to the information they need 24/7, 365 days a year, and is user friendly.

Support and Response:

Our employees are accomplished healthcare professionals who are dedicated to provide customer service and support. All of our products are HIPAA-compliant and secured HTTPS-SSL.
